Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1,14-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Markel et al. 5,624,413 in view of Mahurkar 4,692,141.

Markel et al. discloses a method for inserting a multi-lumen catheter assembly into an area to be catheterized as seen in Figure 1, the multi-lumen catheter assembly having a catheter tube 22 and 24, the tube has a proximal portion and a distal portion see Figure 1 for location, an attachable hub assembly 76 and 78 having a hub body 86 with a distal portion and a proximal portion see Figure 7 for location, the method comprises the steps of: making an incision 70 near the area to be catheterized, inserting the proximal portion of the multi-lumen catheter tube into the area to be catheterized, and creating a subcutaneous tunnel where a first end of the subcutaneous tunnel is near the incision near the area to be catheterized (col. 7, ll. 30-53 and as seen in Figure 2), routing the distal portion of the catheter tube through the subcutaneous tunnel beginning at the first end and exiting through a second end of the subcutaneous tunnel (col. 7, ll. 54-67 onto col. 8, ll. 1-8 and as seen in Figure 2), attaching the proximal

Art Unit: 3754

portion of the hub body to the distal portion of the catheter tube (col. 8, ll. 21-36). Markel et al. lacks the multi-lumen catheter assembly having a multi-lumen catheter tube. Mahurkar teaches the use of having a multi-lumen catheter assembly 10 having a multi-lumen catheter tube 11 (col. 2, ll. 64-68 onto col. 3, ll. 1-45).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to utilize Mahurkar's teaching into the invention of Markel et al. by modifying the catheter tubes 22 and 24 of Markel et al. as such, in order to facilitate insertion of the multi-lumen catheter tube into the area to be catheterized, as taught by Mahurkar (col. 3, ll. 35-37).

Allowable Subject Matter

4. Claims 7-13 are allowed.
5. Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments filed 4/2/2003 have been fully considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Frederick C. Nicolas whose telephone number is (703)-305-6385. The examiner can normally be reached on Monday - Friday from 9:00 AM to 5:00 PM.
